WiMAC Bootcamp: Week 2

WiMAC Team

Assignment 1: Extension

- What if we want to dequeue 1 packet when pressing the button?
- What if we want to flush all the packets at a time?
- What if we need 5 queues instead? How to extend the code?

Optional

- What if we want to enqueue real data? How to read a file of numbers?
- What if we want to dequeue the elements in the queues and write them to another file?

Assignment 2: Host Queues

- Please find out all the Host queues used in 802.11 Application Framework and explain
  - Where are these queues?
  - What are the queues for?
  - Enqueue? Dequeue?
